

# GENERAL NOTES

All drawings to be read in conjunction with relevant Architectural drawings and Services drawings and if any discrepancies refer back to the Engineer for clarifications

All dimensions are in mm and must not be scaled. For any missing dimensions refer back to the Engineer for clarifications

Doubly cross hatched areas indicated block work filled with Grade 20 concrete

## SITE PREPARATIONS AND FOUNDATION

**BURIED SERVICES:-** Before commencement of site preparation and excavation, all existing buried services found on the site shall be exposed by manual excavation and re-located to a position directed by the Engineer

**SITE PREPARATION:-** The area of the building, hard stand access shall be stripped of turf and top soil to a minimum depth of 150mm.

**EXCAVATION:-** Excavation for foundation shall be blinded with 50mm thick concrete of grade 10 immediately the foundation level is reached

Any pockets of soft soil or other unsuitable material found at the bottom of excavation shall be removed until firm ground is reached and level made up with lean concrete or other suitable fill material as directed by the Engineer.

**FILL MATERIAL:-** Fill where required shall be rock laterite or other granular material complying with LL not less than 45, PI not greater than 10 and compacted in 150mm layers to CBR not less than 8%

Unless otherwise noted, the foundation has been designed for allowable bearing pressure of 150 kN/sq.m

All construction joints shall be formed with proper stop ends fixed vertically at locations indicated and / or agreed with the Engineer

**CONCRETE:-** Concrete for construction shall comply with the following  
Structural concrete grade 25 unless otherwise specified  
Mass concrete - grade 15  
lean concrete (blinding) - grade 15  
maximum aggregate size - 20mm  
maximum water content - 0.45

## STEEL REINFORCEMENT

All steel reinforcement shall be in accordance with BS4449  
Fabric reinforcement shall be BS4483

Cover to reinforcements shall be as follows  
Foundation - 50mm  
Columns - 40mm  
Beams - 30mm  
Slabs - 15mm

Lap length (min) - 50 x bar diameter  
Anchorage (min) - 40 x bar diameter

Abbreviations:

R - Round mild steel reinforcement  
Y - High yield bond reinforcement  
T - Top  
B - Bottom  
P - Pitch (centres)  
BW- Both Ways  
NF- Near face  
FF- Far face

## STRUCTURAL STEEL WORK

All steel work shall be grade 43 complying with BS4

All bolts shall be black bolts shall be BS4190

Welding and fabrication shall be in accordance with BS449

Protection system shall be based on current edition of CP2008. Steel work shall thoroughly be wire-brushed to remove mill scale dirt and rust. Oil or grease shall be removed with White Spirit or Naphtha and allowed to dry. Apply one coat of red oxide paint as primer. Any damaged to primer to be sand papered and repainted after erection

## BLOCK WORK

Mix proportion shall be 1:6 cement/sand with water regulated to produce driest mix consistent with full compaction

All blocks shall be cured in shade for at least 5 days and sprayed regularly with water.

Blocks may then be stacked not more than five high in the shade for a further 21 days to dry out

Average strength of 12 blocks not less than 2.76N/sq.mm. Minimum individual strength of block not less than 20N/sq.mm

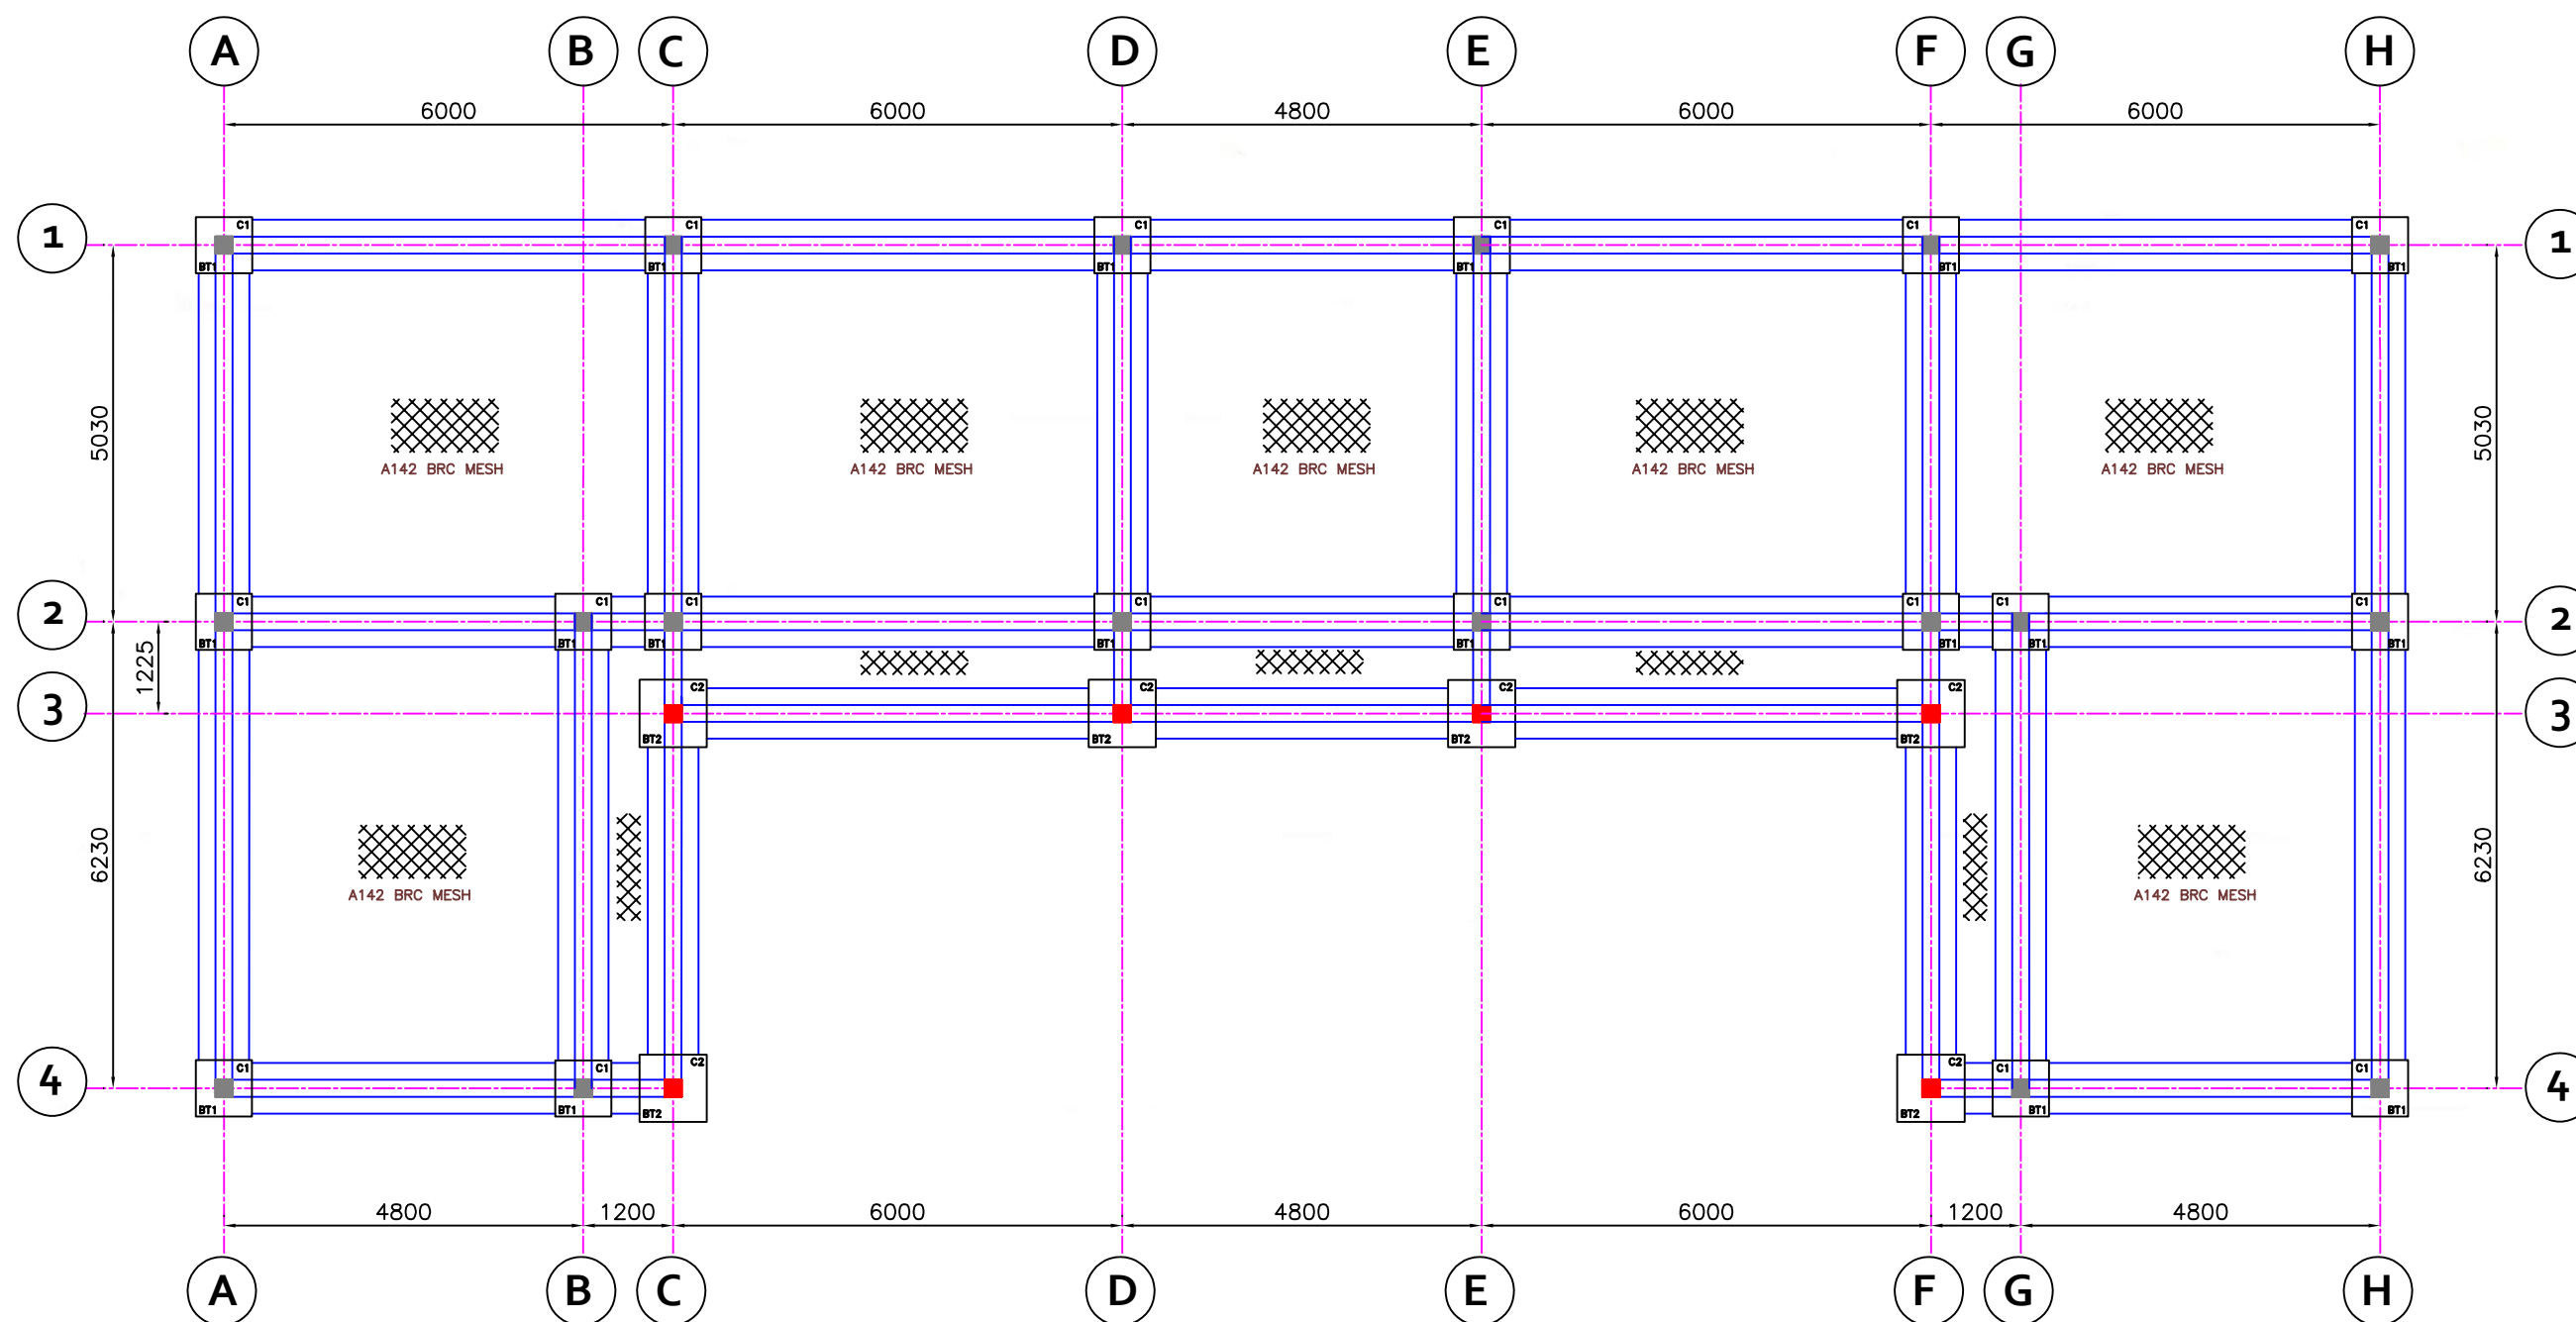

### General Notes:

- Before embarking on any part of the project, study carefully and understand these drawings and other documents relating to the project.
- All drawings are to scale, check for scale on the drawing.
- All dimensions are in millimetres.
- The Architect will not be responsible for any works not supervised by him.
- The Architect should be contacted in case of any ambiguities/clarifications.
- All drawings are the property of the architect, and should not be duplicated or reproduced without his express consent. They are instruments of service and remain the property of the architect whether the project is executed or not. They are therefore returnable to him on request and shall not be used on any other project or an extension of the one for which they are made without the written consent of the said Architect.
